GLOBE

CASTAN LIGHTING

On this new Globe edition we introduce a wide range of pendant luminaires and wall lamps including bigger sizes, more innovative and bold finishes, among which we emphasize the rust in different tonalities such as old-aged gold, worn-effect black and a cyan tone simulating a natural rusting process of about 30 years.

Special mention to the items composed by lamps groups, models matching wood with metal as well as wood linear LED light fixtures and decorative outdoor pieces made of Cor-ten steel and using fire like a light source.

This catalogue, directed to lighting professionals and decor lovers offers suitable products to give a high degree of singularity in their projects.

Due to the fact that manufacture and finishes are handmade, there are not two identical luminaires, and these irregularities are what make unique the Globe series.

With the aim of providing you a total adaptability for your projects, we also offer (under request) all the colours in the Ral range.

GLOBE

CASTAN LIGHTING

En esta nueva edición de Globe presentamos una amplia colección de luminarias colgantes y apliques en la que incluimos modelos de mayor tamaño y acabados más atrevidos e innovadores, en especial los óxidos en diferentes tonos: oro viejo, negro efecto desgastado y una tonalidad cian que simula un proceso de oxidación natural de unos 30 años.

Hacemos especial mención a las luminarias de conjunto de lámparas y modelos combinando metal y madera, lineales de madera con LED y por último piezas decorativas para exterior en acero Cor-ten con el fuego como fuente de luz.

Este catálogo, especialmente dirigido a los profesionales y amantes de la decoración e iluminación, ofrece un producto con el que podrán dotar a sus proyectos de un alto grado de singularidad. Los procesos de fabricación y acabados artesanales aportan al producto irregularidades que dotan a cada luminaria de una apariencia única.

Con el objetivo de proporcionarles una total adaptabilidad a sus proyectos, bajo petición, ofrecemos una amplia gama de colores según carta Ral.

Con el objetivo de presentar una nueva gama de diseños para decoración, Globe ofrece en este catálogo los modelos Fuego, para generar ambientes cálidos en exteriores. Fabricados en acero Corten, presentan un aspecto de óxido texturado de excelente efecto natural. Así mismo, se han incluido en esta colección accesorios como portafuegos o parrillas perforadas que aportan diferentes soluciones en el ámbito decorativo o, incluso, culinario.

Globe introduces a new range of decorative pieces which uses fire as light source. Made of Cor-Ten steel are ideal to be used outdoor. Their design, texture and finishes harmonize perfectly with the luminaires range included on this catalogue. Accessories like fire-holder or grills have been also included for giving decorative, or even culinary, solutions.
