[En] > CANDLE is a suspension lamp composed of a tube in striped borosilicate glass that contains a sandblasted PMMA cylinder inside. At the base of the lamp we find an LED whose light spreads throughout the body of the object. The lamp is suspended by the two electrical cables with which you can adjust its height. The canopy is composed of a white painted ceiling structure and a polished chrome or gold cover disc, fixed to each other by magnets.

[It] > CANDLE è una lampada a sospensione composta da un tubo in vetro borosilicato rigato che contiene al suo interno un cilindro in PMMA sabbiato. Alla base della lampada troviamo un LED la cui luce si diffonde lungo tutto il corpo dell'oggetto. A sostenere la lampada sono gli stessi cavi di alimentazione con i quali è possibile regolare l'altezza. Il rosone della lampada è composta da una struttura a soffitto verniciato bianco e un disco di copertura in cromo o oro lucido, fissati tra di loro tramite calamite.

design Brian Rasmussen

vintage catalog p. 32/ NEWS 2020 catalog p. 04

NEW

[En] > Vintage style lamp collection, composed of curved aluminium elements.

Each element contains an E14 bulb that creates a reflected and indirect light.

The light inside each curved element, in refraction with the external part of the same, produces a singular light-dark effect.

The collection includes: the Suspension, the Applique 1L and 2L, the Floor lamp.

[It] > Lampada di sapore vintage, composta da elementi in alluminio curvi.

Ogni elemento ospita una lampadina E14 con cupola argentata

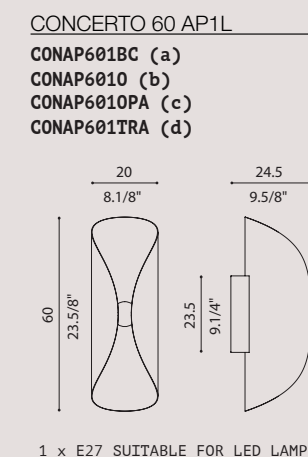

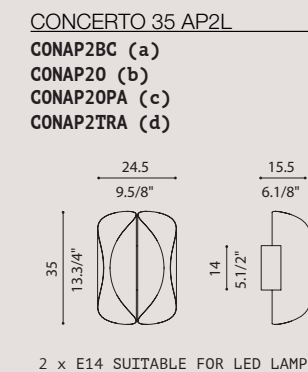

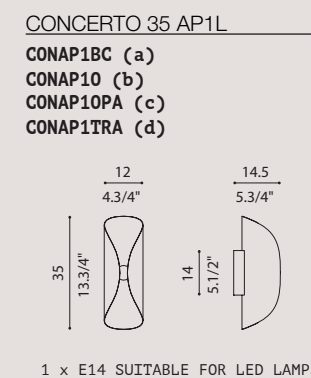

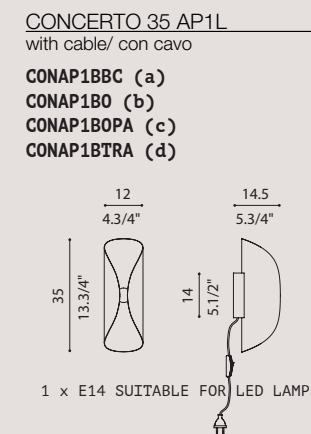

che crea una luce riflessa e indiretta.

La luce all'interno di ogni elemento curvo, in rifrazione con la parte esterna dello stesso, produce un singolare effetto chiaro-scuro.

La collezione prevede: la Sospensione, l'Applique 1L e 2L, la Piantana.

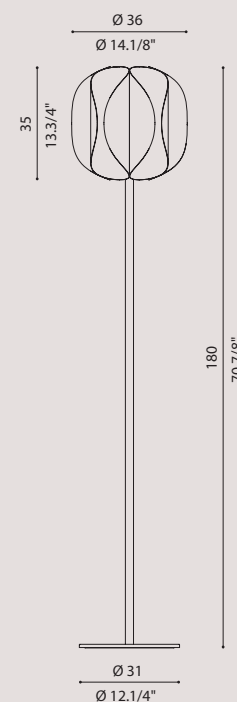

[En] > Back from the success previously obtained, the CONCERTO 2020 collection is expanded with a new size of 60 cm and a new material: PMMA with opal finish or clear with white screen printing..

OFF

[En] > When the lighting fixtures is off, the surface of the silkscreened glass diffuser looks like an even white surface, and you can see only the outlines of the floral decoration. When on, the surface is alive with different color shades, due to the number of silkscreen layers. Along the outline of the decoration, the light is clearer because there is less color; instead towards the center, where there is more color, the intensity of light decreases.

[It] > La superficie serigrafata del diffusore in vetro piano, quando la lampada è spenta, si presenta come una superficie omogenea bianca in cui si notano solo i contorni del decoro floreale. Con la luce, la superficie si anima di diverse tonalità determinate dalla quantità di strati di serigrafia. Lungo il perimetro, la luce è più chiara poichè minore è l'apporto di colore, mentre verso il centro, dove questo è maggiore, diminuisce l'intensità luminosa.

[En] > Braidings of light.

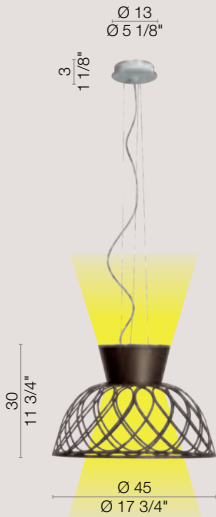

JAM is a suspension lamp characterised by a metal dome enriched by a complex laser cutted ornament. The contrast between the decorated dome and the minimal superior cone creates an aesthetic balance. The light source is located inside the cone shaped element giving the light fixture a minimal aspect without any technical elements visible. The fixture is suspended with 3 steel wires.

[It] > Intrecci di luce.

JAM è una sospensione composta da un paralume a fasce di metallo realizzato con la tecnica del laser 3D, che dona precisione al movimento delle curve, sovrapposto da un tronco di cono che gli dona stabilità, creando delle geometrie ornamentali. La fonte luminosa è nascosta nella parte superiore, realizzando un interessante contrasto tra vuoti e pieni. La lampada è sostenuta da tre cavi in acciaio che ne permettono la regolazione in altezza.

[En] > Lightness in the OMG spider composition that can be implemented with the glass suspended with power cable

[It] > Leggerezza nella composizione OMG a ragno attuabile con i vetri sospesi con cavo di alimentazione.

[En] > **Solid – Void.**
This collection is composed by a cone in metal
and a diffuser in PMMA.
The minimal design of this collection is enriched
by the transparent lens that transmits the strong light
emitted by the light sources inside the upper metal element.

[It] > **Pieno – Vuoto.**
Si tratta di una lampada composta da un tronco di cono in metallo
e un diffusore in PMMA.
Il design minimale di questa collezione, contrasta volutamente,
col forte effetto illuminante.
Ciò è possibile, grazie ad una lente trasparente
che veicola il fascio di luce dalle sorgenti luminose
all'interno del cappello superiore in metallo.

[It] > I diffusori, inferiore e superiore, sono in PMMA opalino. Il flusso luminoso continuo è ottenuto grazie all'assenza di elementi di fissaggio e ad una costruzione innovativa del profilo della lampada che unisce le due pareti in metallo attraverso una staffa anch'essa in metallo. La stessa staffa, poi, sostiene la sorgente luminosa che è inserita in un involuoco di silicone. In tal modo si elimina la puntinatura dello strip LED e si ottiene una luce perfettamente uniforme. La lampada ha emissione luminosa sia verso l'alto che verso il basso.

[En] > A continuous circle of light. The upper and lower diffusers in PMMA are completely without any fixing elements which allows the light emission to be perfectly continuous. This is possible thanks to an innovative construction of the section of the lamp which unites the two sides through an internal metal bracket. The same bracket supports the light source which is integrated in a silicone body allowing the light emission to be completely uniform. The lamp has a double light emission.

[En] > BI-emission lighting.

The constructive principle of the lamp allows a double light emission. This detail makes the product capable of illuminating the surrounding space with a 360 degrees light. The upper and lower light emission are equal both for what concerns quantity and colour giving a completely homogeneous effect.

[It] > BI-emissione luminosa

Il principio costruttivo delle lampade rende possibile una doppia emissione luminosa: in tal modo l'ambiente circostante viene illuminato a 360 gradi. Inoltre, la luce orientata verso l'alto e verso il basso è uguale sia per quantità che per colore al fine di rendere il flusso di luce completamente omogeneo.
